

INTRODUCTION

You **HAVE** to learn the approach to the "Other Stuff" - Not just the "Core 4"

Examples of the "Core 4"

Neurologic

Headache

Altered Mental Status

Cardiac

Chest Pain

Pulmonary

Shortness of Breath

Cough

Gastrointestinal

Abdominal Pain

Nausea & Vomiting

Examples of the "Other Stuff"

Epistaxis

Acute Urinary Retention

Laceration Repair

Red Eyes

Key Points

1) Study the "Core 4" to pass your shelf exam.

http://www.nbme.org/Schools/Subject-Exams/Subjects/ace_emergmed.html

2) Study the "Other Stuff" to get a good clinical grade

3) All you need to know for the "Other Stuff" is a simple clinical approach

4) Learn the format of the "SLOE"
